

Sperm Reactive Oxygen Species (ROS) Assay (NBT)

- *High level of ROS could lead to oxidative stress injury, negatively affecting fertility.*
- *This kit is to test the superoxide anion radical volume in sperm, intuitively reflecting the true level of ROS.*
- *In good relevance with the results of chemiluminescence method.*
- *Operated on microplate reader(630-nm wavelength).*

Anti-Mullerian Hormone Assay (ELISA)

- *To evaluate the fertility potential of women by testing the ovarian reserve function(low AMH , low fertility).*
- *High-Specificity and Good-accuracy.*
